Consolidated Storage and File Server Solution for City Hall

The City of San Jose is soliciting proposals to consolidate key elements of the IT infrastructures which support electronic data storage and application processing. The consolidation of technical infrastructures will help the City to meet the following business objectives:

- Enhance business processes and more cost-effectively meet customer service needs of both the community and City employees.
- Optimize the use of existing technical staff and infrastructure resources.
- Enable more cost effective maintenance and management of information technology infrastructures.
- Enhance disaster recovery and business continuity processes pertaining to technology solutions.
- Heighten organizational flexibility and agility to accommodate the City's evolving service needs through scalable technology solutions.

Proposal instructions and forms are available for download on the DemandStar system at <http://www.demandstar.com>. You must register on this system in order to receive any bid documents. To register, contact Onvia supplier support at 1-800-711-1712. There is no charge if you tell them that you are registering for City of San Jose procurements.
